- **What went well**

- Use case diagram : Draft and complete use case diagram 100% completed.
- Use case specification: 100% completed.
- Revised project plan: Rewrite Project Plan depending on sprint timeline 100% completed.
- Revised vision document: Add more detailed non-functional requirements 100% completed.

- **What went wrong**

- Too much time was spent on the Use-Case Model as members are confused and still ambiguous about some features as well as the design of the website which also made the writing process of Use-Case Specification meet some difficulties.
- The UI sketching was not done on time as the deliverables for this sprint including Use-Case Model and Specification consumed so much time.

- **Lessons learned**

- The team needs to improve the efficiency of the working progress as tasks need to be completed sooner so that the team can check together more carefully and fix if any changes are required.
- It is essential for the team to understand the requirements properly to avoid ambiguity and loss of time.

- **Jira plan:**

GROUP Sprint 2
Understand the functions properly and have a clear image of the interface of the Website.
